

INTERCONNECTION OF INDUSTRIAL ARCHITECTURES

IPL & SIG industrial routers are used to simply and safely interconnect remote industrial equipments.

These highly resistant products are dedicated to water, energy, industry and smart cities markets.

Router Firewall IPL & SIG

- **VPN concentrator**
(10 up to 1000 tunnels)
- **MultiWAN**
(Ethernet, ADSL, 4G/3G+, Wi-Fi)
- **High availability router with backup**
- **Wi-Fi**
(Access Point & Client)
- **Alert & Display**
(SMS, E-mail, Datalogger)
- **Tracking (GPS)**
- **5 years warranty**

CONNECTING TO A SCADA SYSTEM

Building of a complete solution with a SIG located close to the SCADA system. The IPL located onto the remote sites are interconnected to the SIG (VPN tunnels)

If the number of remote sites is large, two SIG can be installed in parallel to share the throughput.

You can access from your tablet or smartphone to remote devices via the SIG (VPN, HTTPS)

INTERCONNECTING REMOTE EQUIPMENT

Using VPN technology (OpenVPN, IPSEC), you can safely interconnect equipment. One of the IPL will act as a VPN concentrator.

Remote sites can be interconnected via cellular IPL using Etic Telecom proprietary DYNDNS function. You would thus only need a basic data subscription with a non fixed public IP address.

ROUTERS WITH EMERGENCY BACKUP LINK

Critical sites can also be equipped with IPL routers capable of managing a main link and a backup link.

For example, the IPL-DAC router allows you to switch data over the 4G / 3G+ network when the ADSL link fails.

IPL-WAN-CODE 1-CODE 2

WAN can be Cellular (C and CW with Wi-Fi), ADSL (A and AW with Wi-Fi), Ethernet (E and EW with Wi-Fi), ADSL with backup cellular (DAC), Ethernet with backup cellular (DEC), ADSL with backup Ethernet (DAE), serial (S), PSTN (M).

CODE 1	100*	400	220	230	260	261
Ethernet 10/100 MDI MDIW	1	4	2	2	2	2
RS232 link	-	-	1	2	-	-
Non isolated RS485 link			1			
Isolated RS485 link						1
Isolated 422 link					1	
USB link		1	1	1	1	1
CODE 2 (CELLULAR WAN)	HG	LE	LS	LA	CH	
	3G+ "Word Wide"	4G Europe	4G USA 3G+	4G Asia 3G+	4G China	

*not available for ADSL, -D, -S, -M IPLs
